He posted an update 2 days ago and added a couple of features, so props to him! I love that there's a new update on the New Year. On my first try, I couldn't find a way to add widgets, but if I had to do it over again, I'd know to look for a "Design" button or something similar. I also have to add that there are a lot of videos that I'd like to see, but don't. I'd rather have some to start with and maybe when the developer adds them, I'll be satisfied. Other than that, the app is easy to use and with the API, it's pretty awesome. Thanks for the updates and here's hoping you're able to keep up the good work in 2016!
